FOUNDER EXPERIENCE

Founder

2025 - Apr 2026

Milnr AI Labs

- Building AI-native systems focused on **multi-agent orchestration**, developer tools, and persistent AI memory layers.
- Built **Fermeon** ([fermeon.xyz](#)) - a cross-platform AI memory layer enabling persistent context across ChatGPT, Claude, Gemini, and other tools; ranked **12/467** on Product Hunt.
- Engineered context pipelines eliminating repeated prompting across LLMs via synchronized memory injection.
- Built **Meetly** ([mymeetly.xyz](#)) - an AI event networking system built in **3 days**; deployed at Draper Startup House and reached **800+ users in 2 weeks**.
- Implemented indoor discovery using WiFi fingerprinting and directional navigation for real-time attendee matching.

Founding Engineer

March 2026 - Apr 2026

TryDonna

- Built an **agent-to-agent hiring system** where autonomous AI agents represent candidates and recruiters.
- Designed adaptive AI personas that evolve from user behavior and negotiate opportunities.
- Enabled direct agent-level interaction removing manual job application workflows.
- Ranked **#8 globally** on Product Hunt YC collab day among 250+ launches.

WORK EXPERIENCE

Summer Intern - Technology

Jun 2026 - Aug 2026

Barclays Global Service Centre

Pune

- Migrated legacy CI/CD pipelines from **TeamCity to GitLab CI**, modernizing deployment workflows and improving maintainability.
- Re-architected deployment configurations to align with Barclays' **Engineering Practices (EP)** standards and best practices.
- Successfully deployed the migrated pipelines and services to **production**, ensuring a seamless transition with minimal operational disruption.

Business Intelligence Intern

May 2025 - Oct 2025

DCB Bank

Mumbai

- Built a **production-grade fraud detection system** using DeepFace, YOLOv8, and CLIP, preventing **\$1M+ quarterly losses**.
- Reduced manual verification workload by **95%** across loan processing workflows.
- Designed similarity pipelines using FAISS for identity and asset verification at scale.
- Built a Streamlit-based processing system handling **40,000+ loan PDFs**.
- Developed an RBI policy gap analysis system using AWS Bedrock with serverless architecture.

Tech Head

Jul 2024 - Jan 2026

Computer Society of India - KJSCE

- Built **Eventio**, a full-stack event platform used by **1000+ students**.
- Led engineering of a national hackathon platform used by **2000+ participants**.

- Developed scalable Node.js backends and React frontends with RBAC and QR-based attendance systems.

ACHIEVEMENTS

Top 6 - OpenAI Codex Hackathon, Bengaluru

- Placed **Top 6 out of 4,500 applicants**; selected among **top 100** in a highly competitive cohort.
- Built a **multi-agent orchestration system** in VS Code enabling parallel Codex execution with isolated git worktrees and real-time coordination.
- **Shipped end-to-end in under 6 hours** during live hackathon conditions.
- Awarded **\$2,400 in credits**.

Winner - Paytm AI Hackathon

- Won the **Paytm AI Hackathon**, conducted at the Paytm Mumbai office in partnership with **Sarvam AI**, Logitech, and HackCulture.

Silver - Unstoppable Hackathon (Open-Source Track)

- Delivered production-grade fixes in live blockchain repositories during a **33-hour sprint**.
- Collaborated with maintainers and shipped code merged into production systems.

1st runner up - Fynd Hacktimus Hackathon

- Built an AI pricing system using XGBoost with automated strategy generation.

Top 100 - ZS Campus Beats Tech Challenge

- Selected among the **Top 100** teams nationwide in the ZS Campus Beats Tech Challenge.

PROJECTS

ClawIN (clawin.xyz)

- Built a **network for AI agents** enabling autonomous discovery, communication, and collaboration; reached **250+ users on day 1**.
- Designed infrastructure supporting agent-to-agent communication protocols.

FloatChat

- Built an AI interface over ARGO datasets with natural language to SQL/vector query pipelines.
- Developed geospatial dashboards for real-time oceanographic data exploration.

ChitChain

- Built a decentralized chit fund protocol on Aptos targeting **12–15% returns**.

TECHNICAL SKILLS

AI Systems	Multi-agent orchestration, embeddings, vector search (FAISS), RAG
Backend	Node.js, FastAPI, distributed systems
ML / AI	PyTorch, YOLOv8, DeepFace, OpenAI CLIP
Frontend	React, Next.js
Databases	PostgreSQL, Chroma, Prisma ORM
DevOps	Docker, AWS, GCP, Linux
